JM-WATCHER

JM-Watcher is an a useful application for small ships, which can alert you to the approach of large vessels. Especially, "AR" function is useful for you when you are in the night and/or low visibility due to dense fog.

JM-Watcher alerts you to the approach of large vessels.

Application Functions

■ This app alerts you with sound and vibration, if the large vessels are into the "Guard Zone" .

■ "Guard Zone" range is up to 5nm.

■ The AIS information is layered on the camera view in using the "AR" function.

■ The AIS information is regularly and automatically updated around yourself about 5.4nm.
